# Line Dribbling Drills

**DRIBBLING / BALL HANDLING / CHANGE OF PACE**

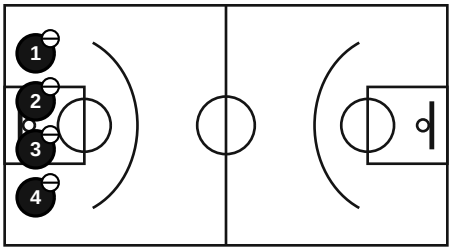
Players advance in lanes while controlling pace, direction, and hand changes at designated court marks.

**ALL PLAYERS | 1 BALL EACH | FULL COURT**

## STEP 1

### SET FOUR DRIBBLING LANES

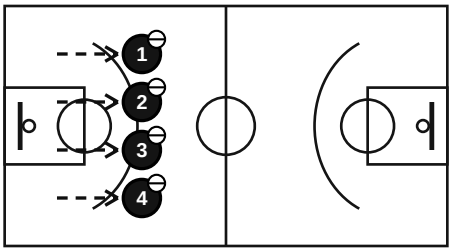
Form four baseline lines. Each player begins low and balanced with a basketball, fingertips active and eyes up.



## STEP 2

### CHANGE PACE UNDER CONTROL

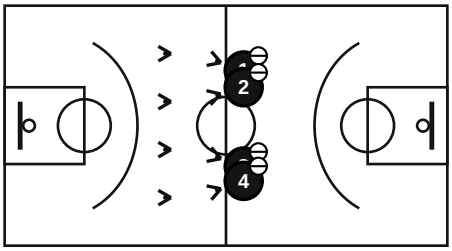
Use a speed dribble, then lower the body and shift into a protected control dribble at the designated mark.



## STEP 3

### EXECUTE THE DESIGNATED MOVE

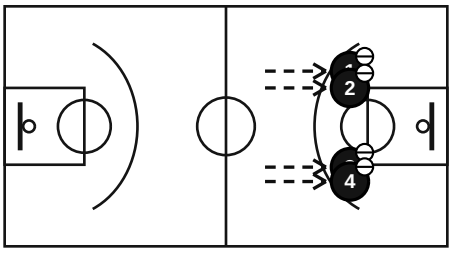
At the next mark, use the selected crossover, inside-out, reverse, or hesitation move while protecting the ball.



## STEP 4

### ATTACK OUT OF THE MOVE

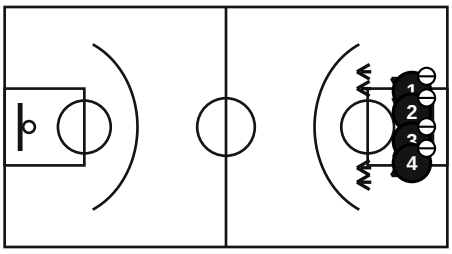
Plant the outside foot, push off explosively, and accelerate into open court without losing balance or looking down.



## STEP 5

### FINISH AND CHANGE DIRECTION

Finish under control at the far end. On the next repetition, use a zig-zag route with additional changes of hand and direction.



**VARIATION** Use follow-the-leader, with every player copying the designated leader's moves.
