Pass, Shoot And Rebound

SHOOTING / PASSING / REBOUNDING

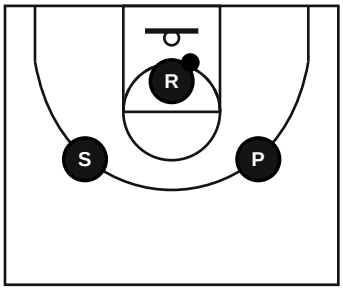
A three-player sequence connects the rebounder, passer, and shooter before repeating or rotating roles.

3 PLAYERS | 1 BALL | HALF COURT

STEP 1

ASSIGN THREE ROLES

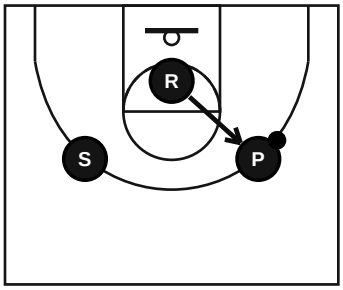
Set one rebounder under the basket, one passer on the wing, and one shooter in range. The rebounder starts with the ball.



STEP 2

OUTLET TO THE PASSER

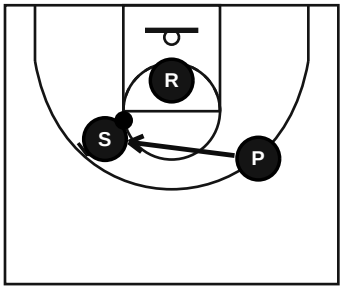
The rebounder protects the ball, pivots away from pressure, and delivers a strong pass to the ready passer.



STEP 3

HIT THE SHOOTING POCKET

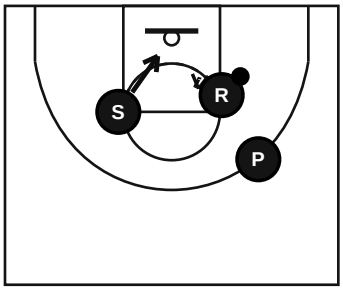
The passer quickly moves the ball into the shooting pocket. The shooter receives low, balanced, and ready to score.



STEP 4

SHOOT AND REBOUND

The shooter releases with correct form. The rebounder tracks the shot, secures the rebound, and protects it with two hands.



STEP 5

REPEAT OR ROTATE

Repeat for the assigned time or rotate roles after each shot so every player practices passing, shooting, and rebounding.

VARIATIONS

- Run for a set time, then rotate roles.
- Rotate after every shot.
- Add a dribble, relocation, shot fake, or jab step before shooting.
