Lay-up And Rebounding Lines

LAY-UPS / REBOUNDING / PASSING

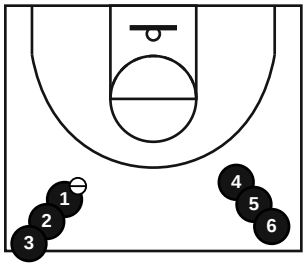
Two lines work at game speed as one player drives for a lay-up and the opposite line rebounds, outlets, and rotates.

ALL PLAYERS | 1 BALL | HALF COURT

STEP 1

SET UP TWO LINES

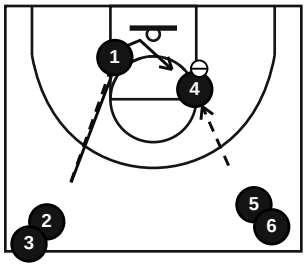
Create one shooting line and one rebounding line. The first shooter begins with the ball, and the first rebounder gets ready on the opposite side.



STEP 2

DRIVE, SHOOT AND ANTICIPATE

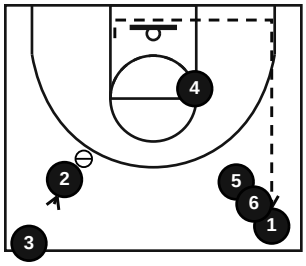
The first player from the shooting line drives to the hoop and shoots a lay-up while the first player from the rebounding line moves forward ready for the rebound.



STEP 3

SECURE, PASS AND ROTATE

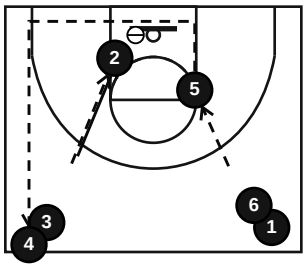
The rebounder secures and protects the ball, then outlets to the next shooter moving toward the pass. The shooter rotates to the end of the rebounding line.



STEP 4

CONTINUE THE DRILL

After making the outlet pass, the rebounder joins the end of the shooting line. The next shooter attacks the basket while the next rebounder steps in and anticipates the shot.



VARIATION Run the drill from the opposite side of the court.
